Profile

I am currently pursuing a Bachelor of Engineering in Computer Science and Engineering at Sri Krishna College of Engineering and Technology. I have a passion for developing innovative software solutions and am skilled in multiple programming languages, including Python, Java, C/C++, and JavaScript (React JS). I possess strong problem-solving and analytical skills, am highly adaptable, and am quick to learn new technologies.

Education

2023/09 – present Coimbatore, India	B.E Computer Science Engineering <i>Sri Krishna College of Engineering and Technology</i>  Modules: Cloud technologies, DBMS, Programming Languages: Java, C++, Python, Data Structures, Statistical modeling, Data Analytics, Machine learning, Differential, and Integral Calculus. CGPA: 8.36
2009/06 – 2023/04 Salem, India	Higher Education <i>Holy Cross Matriculation Higher Secondary School</i> Percentage: 87%

Achievements

2023/09/15	Winner of Ignite'23 Project Expo <i>organized by Sri Krishna College of Engineering and Technology India</i>
2023/11/17	Winner of Catalyst Ideathon <i>organized by Sri Krishna College of Engineering and Technology India</i>
2024/01/17	Participated in RACCAM (Rajasthan Police Cyber Crime Awareness Mission) <i>organized by Rajasthan Police in Jaipur India</i>
2024/05/11	Participated in HackBangalore 2024 (The Global Hackathon Series) <i>organized by AngelHack in Bangalore India</i>
2024/12/11	Participated in Smart India Hackathon (SIH) 2024 - Hardware Edition <i>organised by NTRO India in IIT Roorke</i>
2025/01/18	Participated in Hack&Roll 2025(NUS University) <i>organised by NUS University Singapore</i>

Projects

2024/01	Analysis of FIR using AI/ML for proper Act and Section  https://github.com/AdityaSubramanianSudhakar/RJPOLICE_HACK_1346_ZERO_BUGS_4 Developed an NLP system to extract key details from complainant information, converting it into a structured format for FIR analysis. The system suggests relevant IPC sections based on complaint language, improving investigative accuracy. Features include user login for police officials, interactive text input, automated text extraction from various file formats, and real-time retrieval of Acts and Sections for enhanced efficiency and versatility.
2025/09	Smart Leave Management System Engineered a role-based web application to automate employee leave management and approval workflows. Developed features for leave request submission, approval tracking, leave balance management, and administrative control through dedicated dashboards. Implemented JWT authentication, role-based authorization, and RESTful APIs to enable secure and efficient communication between the React frontend and Spring Boot backend. Leveraged MySQL for structured data management, delivering a scalable and user-friendly solution that minimizes manual processes and improves organizational productivity.
2026/03	Intelligent Civic Issue Reporting Website Designed and developed a full stack web application that enables users to report and monitor civic issues through an interactive digital platform. The system supports image uploads location based issue reporting complaint categorization and real time status tracking. Implemented secure user authentication role based access and an administrative dashboard for managing and updating complaints efficiently. Developed responsive user interfaces and integrated RESTful APIs for seamless communication between frontend and backend services. The platform focuses on improving public engagement transparency and streamlined issue management using modern web technologies including React Spring Boot and MySQL.

Skills

Web Development HTML, CSS, JAVASCRIPT, React(JS), Flask (python), MySQL, Git, SpringBoot	Tools Visual Studio Code, GitHub, AWS Cloud Platform, Figma, Canva, Postman
---	--

Certificates

• Data Structures and Algorithms course in Infosys SpringBoard	• Python Essentials 1 in Cisco Networking Academy
--	---
